DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I in the reply filed on 10/23/07 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 5-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is only one step of forming a cavity, but the claims provide the limitations "the steps of forming a cavity" and "the steps of forming a central bore". Claims are ambiguous and competitors would be unable to discern the bounds of the invention.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Shigihara et al (US 6,094,815).

Shigihara discloses a workpiece (S1); forging (S4) having a homogenous mechanical properties (col. 4, lines 50-53); it is inherent that vane grooves 71 will be occupied by vanes; 10

prevents the workpiece from radial expansion; since Shigihara discloses all the claimed steps, the rotor is a bell-shaped rotor; 80 and 22 form cavities while the workpiece is prevented from its radial expansions by a mold 20 (col. 4, lines 31-45); polishing the cavities (col. 4, lines 11-13).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shigihara et al (US 6,094,815) in view of Papst et al (US 3,786,290), and further in view of Parizek (US 4,789,410).

Shigihara fails to disclose forming a central bore on a bottom of the cavity and subsequently performing a thermal treatment.

Papst discloses forming a central bore (where 11 is going thru 14) on a bottom of the cavity (where 11 lies).

Parizek discloses performing a thermal treatment (Abstract).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Shigihara by forming a central bore on a bottom of the cavity and subsequently performing a thermal treatment, as taught by Papst and Parizek, for the purpose of placing a stator and establishing metallurgical and mechanical properties.

8. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shigihara et al (US 6,094,815) as applied to claim 1 above, and further in view of Sun (US 5,507,617).

Shigihara fails to disclose milling the vanes.

Art Unit: 3726

Sun discloses milling the vanes (col. 5, lines 41-43).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Shigihara by milling the vanes, as taught by Sun, for the purpose of removing unwanted burrs and imperfections from the vanes to meet the desired design characteristics.

Conclusion

9. Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity (optional).

Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.
